

# Added References to "Multiple Time Scale Dynamics"

Christian Kuehn

August 21, 2018

## Abstract

This document is going to list the missed references for the book [Kue15]. In particular, I have tried to be quite thorough with collecting references which deal directly with multiple time scale dynamics (over 3000 total) but it is still likely that I missed quite a few. **IMPORTANT:** The cut-off for the reference list was **31/12/2013** and only references available electronically at this point or already in print were included. This document does adhere to the same cut-off date; however, please feel free to let me know about more recent interesting works as well.
